

# CS 534 Phase 3 - Project Presentation and Slides (20 Points)

## (Due: 11:59 p.m. on July 29<sup>th</sup>, 2025)

For the class participation that may impact your final grade, some friendly reminders are:

- (1) Each member of **ALL** teams must attend all the demonstrations on the presentation date.
- (2) **ALL** members of the team must conduct a part of the presentation to demonstrate their skills.
- (3) Since we have 10 teams, **five teams** will be randomly selected to conduct the presentations. Please well prepare for your presentations.

**Requirements:** The final project presentations with demonstrations will roughly last for **30 minutes per team**. This presentation slot includes everything, that is, setup time, presentation time, and demonstration time in the first **20 min**. After that, we leave about **10 min for the Q & A session per team**. Thus, please do plan your time carefully to provide the class with an insight into the most interesting aspects of your project. Also, do make sure to practice this beforehand to get your timing down, and to figure out how to bring out the highlights of your accomplishments.

Focus on the main accomplishments of your project, highlighting the key characteristics of the working project you have built and developed, and convincing the audience of the quality and magnitude of the project you have implemented via a working demonstration.

In the worst case, if your project is not working (or may not be working on that evening), be prepared by a-priori putting together sample screen dumps or project runs as backup to show to the class (on power point). In the worst case, if your project does not work on that evening but you know that it generally works, then we would schedule an alternate time slot with your team and the instructor to make a second attempt to give your project demonstration.

**Grading Criteria:** The grade will be given using the following:

- Oral project presentation and demonstration, including the quality of your presentation slides and the overall flow and content of your presentation (clear, well-organized and informative) **(5 Points)**
- Demonstration of your project, in particular, does your demonstration include successful example runs, set of functions shown, and other means of illustrating that the project is indeed working and successfully tested? **(5 Points)**
- Scope of your project and features accomplished, that is, does your project perform all the functions/capabilities described in your project proposal and progress report? **(5 Points)**
- Q & A Presentation Assignments. **(5 Points)**

**Deliverables:** Presentation Slides **(Due at 11:59 p.m. on July 29<sup>th</sup>, 2025)** and Project Presentation & Demonstration on **July 30<sup>th</sup>, 2025 (6:00 p.m. to 9:00 p.m.)**, respectively.

### Project Presentation Contents:

1. Introduction
  - i. Motivation and Background of Your Project
  - ii. Domain Problem that the Current SOTA Methods Address on with Their Advantages.
  - iii. Summary of Your Proposed High-level Solution and Process to Address the Problem.
2. Related Work of Your SOTA Methods
3. Detailed Proposed High-level Solution and Process
4. Project Demonstration for Validating Your Project
5. Experimental Results and Discussions
6. Lessons Learned in this Project
7. Conclusions and Future Work
8. Questions and Answers

**Q & A Presentation Assignments:** The Q & A teams will be assigned to ask at least one question to the presentation teams after they have been randomly selected.

| Presentation Teams | Q & A Teams |
